

Forensic Investigations | Philadelphia

This program will introduce students in grades 9 – 12 to forensic science through hands-on instruction, guest speakers, experiential learning and application of the theory and techniques used in forensic investigations.

Students will process mock crime scenes and discuss case scenarios learning how to properly identify, document, and preserve physical evidence. Forensic disciplines discussed would include but are not limited to fingerprint processing and identification, impression evidence recovery and comparison, bloodstain pattern analysis, forensic entomology, anthropology, forensic chemistry and biology.

June 20, 2022 – June 23, 2022

Monday – Thursday | 9:00 AM - 4:00 PM

Harrisburg University - Philadelphia | 16th St. Entrance, 492-486 N 16th St, Philadelphia, PA 19130.
